## MPI Special Issue, History of Medical Physics

The History of Medical Physics project was initiated back in 2007. It was initiated in 2016 as an IOMP supported activity. The brief of the project was described in the Medical Physics International Journal (MPI 2017, v5 No1, p.68), where all project results will be published in Special Issues. The project objective is to show the creation and evolution of different equipment and methods, as well as their clinical application; the overall development of the profession and the main contributors in the various topics in medical physics. This project will continue its development over many years ahead and will be left with open end in order to be constantly updated in future. The History of Medical Physics project is also related to the visibility of medical physicists, as it will show the contribution of our profession to the overall development of contemporary healthcare. Follow the Content of the Special Issues of MPI dedicated to History of Medical Physics.

### Content

## MPI Vol. 6 No. 1 - Special Issue, History of Medical Physics

Medical Physics International

 Here you could download the full issue of MPI Vol. 6 No. 1 - Special Issue, History of Medical Physics(11 MB PDF file)

Title	Authors
<b>EDITORIAL</b>	
 EDITORIAL	<i>Perry Sprawls Slavik Tabakov</i>
<b>IOMP Project History of Medical Physics (Selected Papers)</b>	
 X-RAY TUBES DEVELOPMENT - IOMP HISTORY OF MEDICAL PHYSICS	<i>Rolf Behling</i>
 FILM-SCREEN RADIOGRAPHY RECEPTOR DEVELOPMENT A HISTORICAL PERSPECTIVE	<i>Perry Sprawls</i>
 HISTORY OF MEDICAL PHYSICS E-LEARNING INTRODUCTION AND FIRST ACTIVITIES - IOMP HISTORY OF MEDICAL PHYSICS	<i>Slavik Tabakov</i>

## MPI Vol. 7 No. 2 - Special Issue, History of Medical Physics 2

Medical Physics International

 Here you could download the full issue of MPI Vol. 7 No. 2 - Special Issue, History of Medical Physics 2(14 MB PDF file)
