

256 shades of gray: Exploring your body with medical imaging

A. Kyle Jones, Ph.D.

MD Anderson Cancer Center

Learning objectives

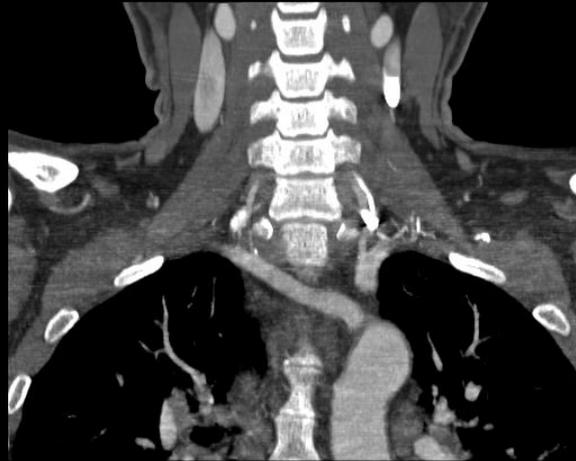

1. Review radiologic imaging planes and projections.
2. Identify major structures in medical images of the human body.
3. Examine how disease processes affect normal anatomy and their impact on medical images.

ANATOMIC PLANES AND PROJECTIONS

Anatomic planes

Axial

Coronal

Sagittal

Radiographic projections

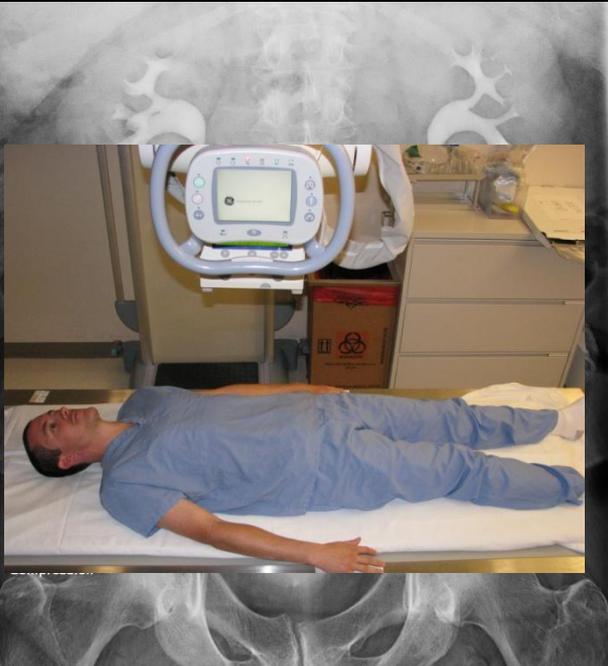

Posteroanterior (PA)

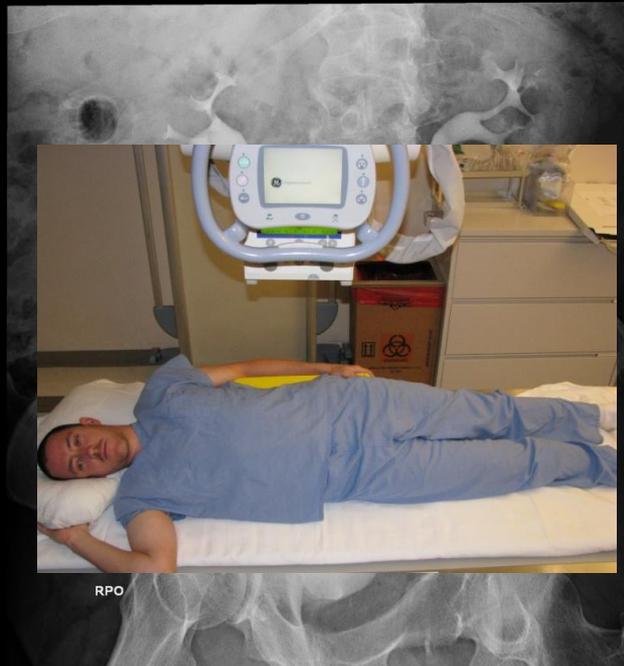

Left lateral (LL)

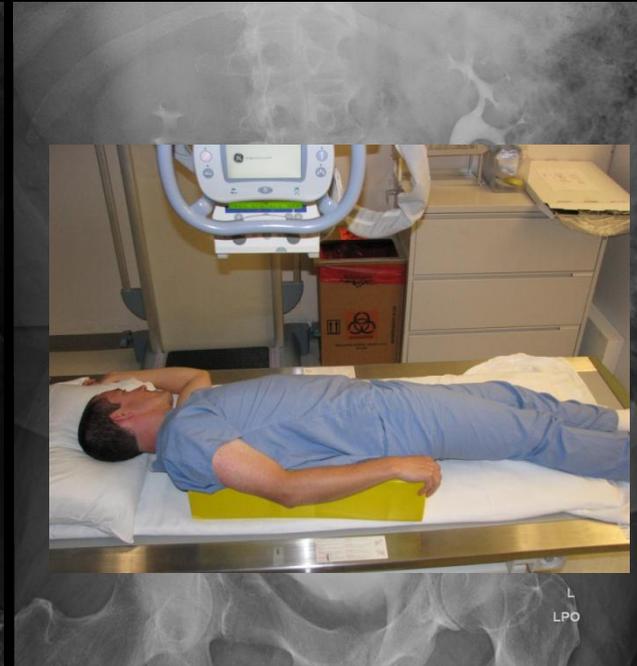

Radiographic projections

Anteroposterior (AP)

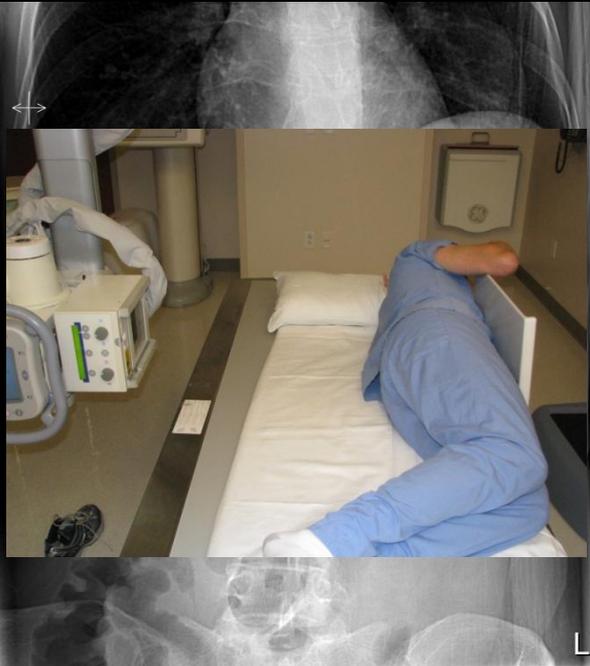

Right posterior oblique
(RPO)

Left posterior oblique
(LPO)

Radiographic projections

Left decubitus

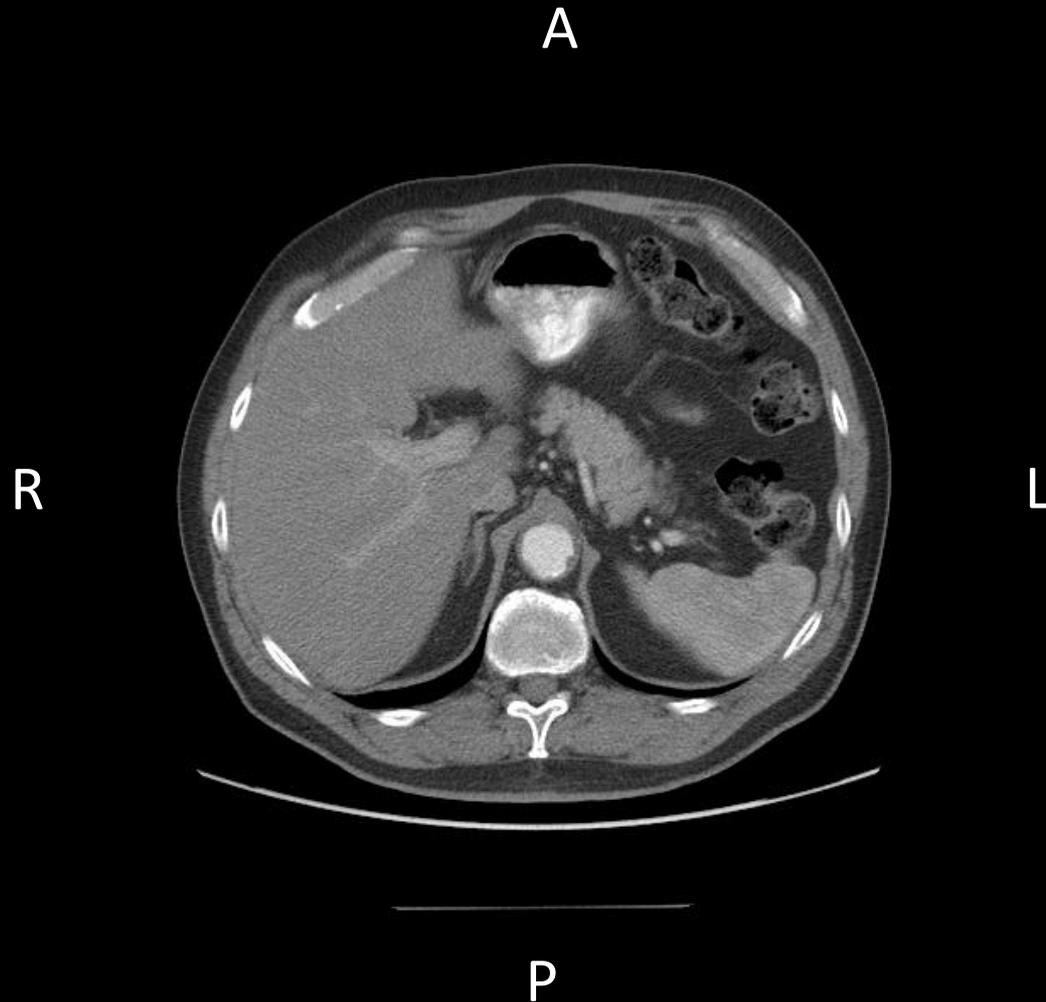

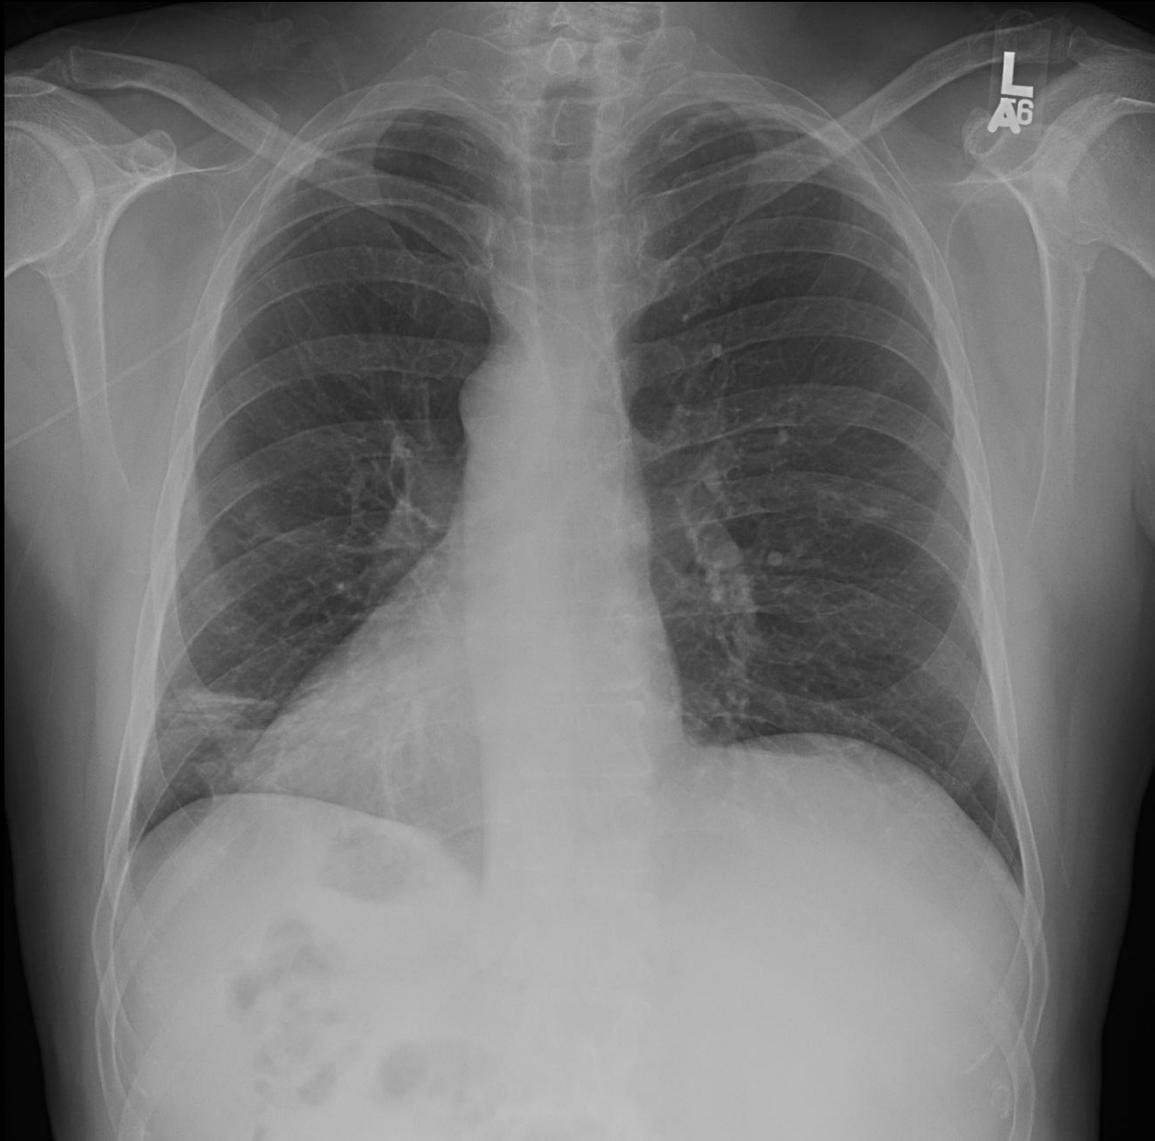

Right decubitus

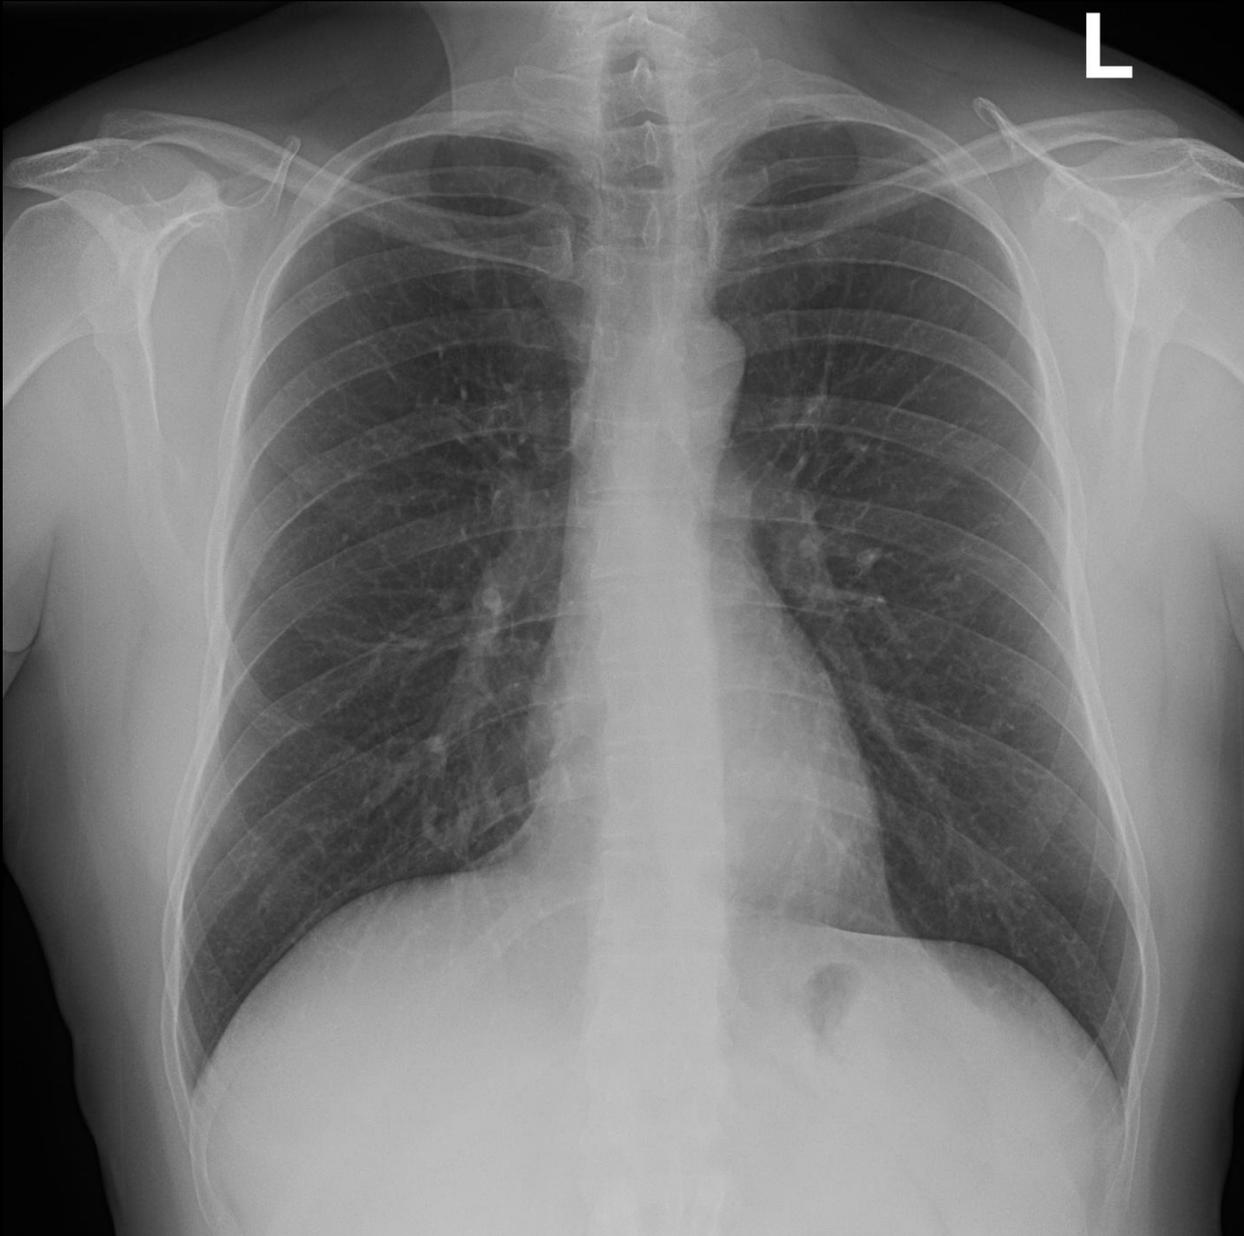

AP

Cross-sectional conventions

THE CHEST

- Apex
- Cardiac shadow
- Aortic arch
- Hilum
- Carina
- Costophrenic angle
- Mediastinum
- Thoracic inlet

L ADC RAD

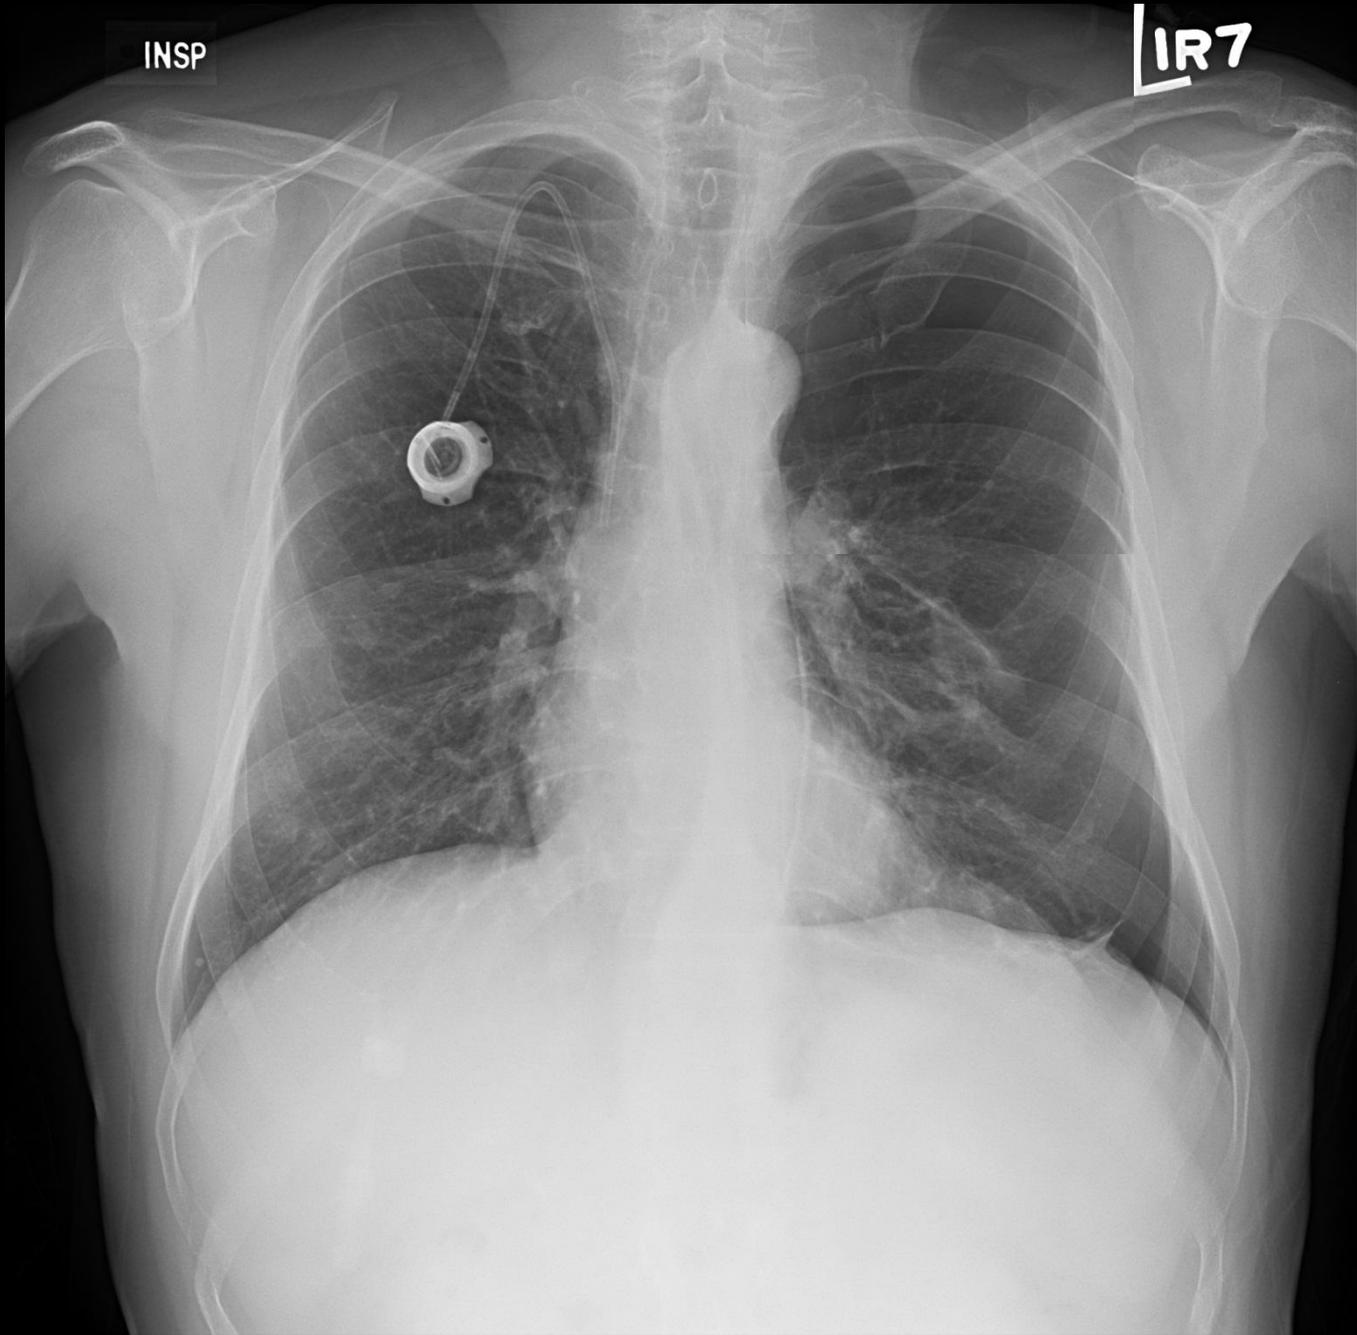

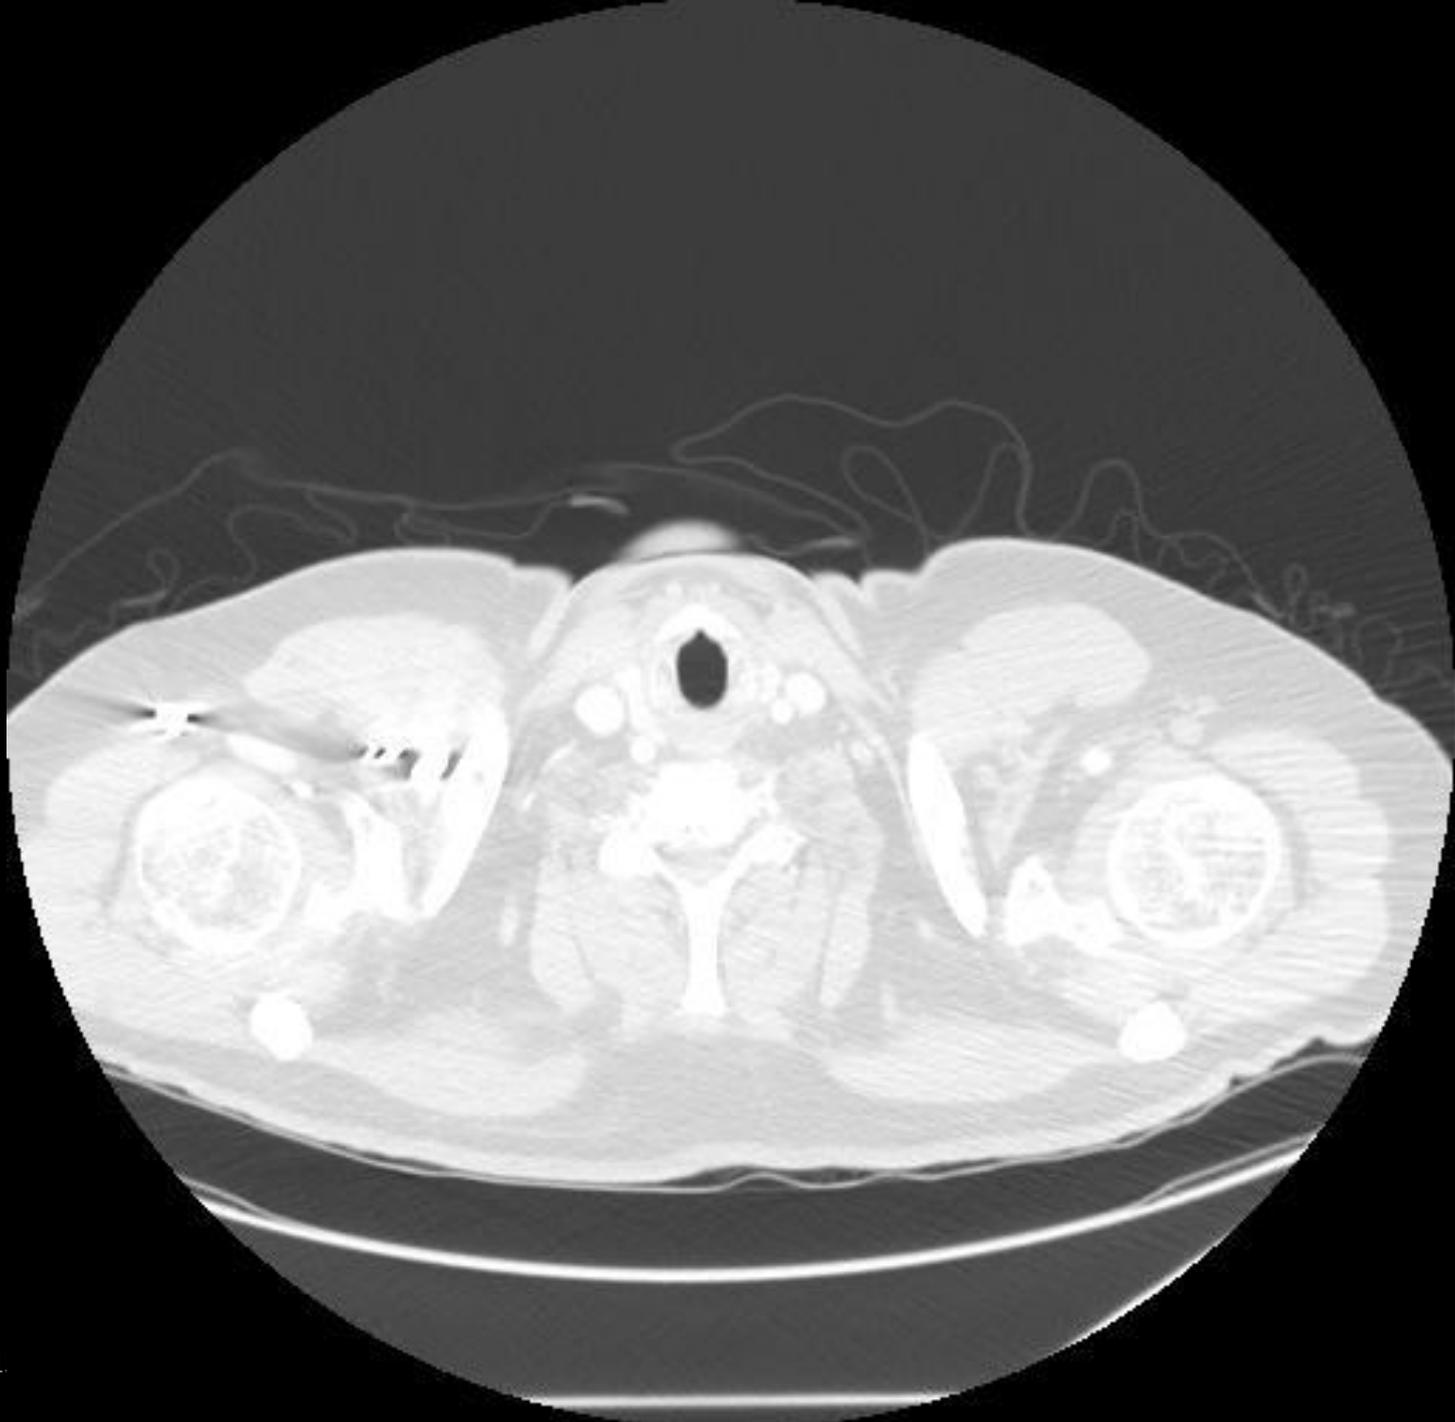

- Apex
- Aortic arch
- Trachea
- Retrosternal space
- Retrocardiac space
- Raider's triangle
- Hilum
- Mediastinum

VASCULAR ANATOMY

Coronary arteries

- Left main trunk (LCA)
- Left anterior descending
- Circumflex
- Right coronary artery (RCA)
- Posterior descending artery (PDA)
- Coronary sinus
- Tricuspid valve
- Mitral valve
- Aortic valve
- Papillary muscles

RCA LAO 36 caud 15

LCA LAO41 cran 232

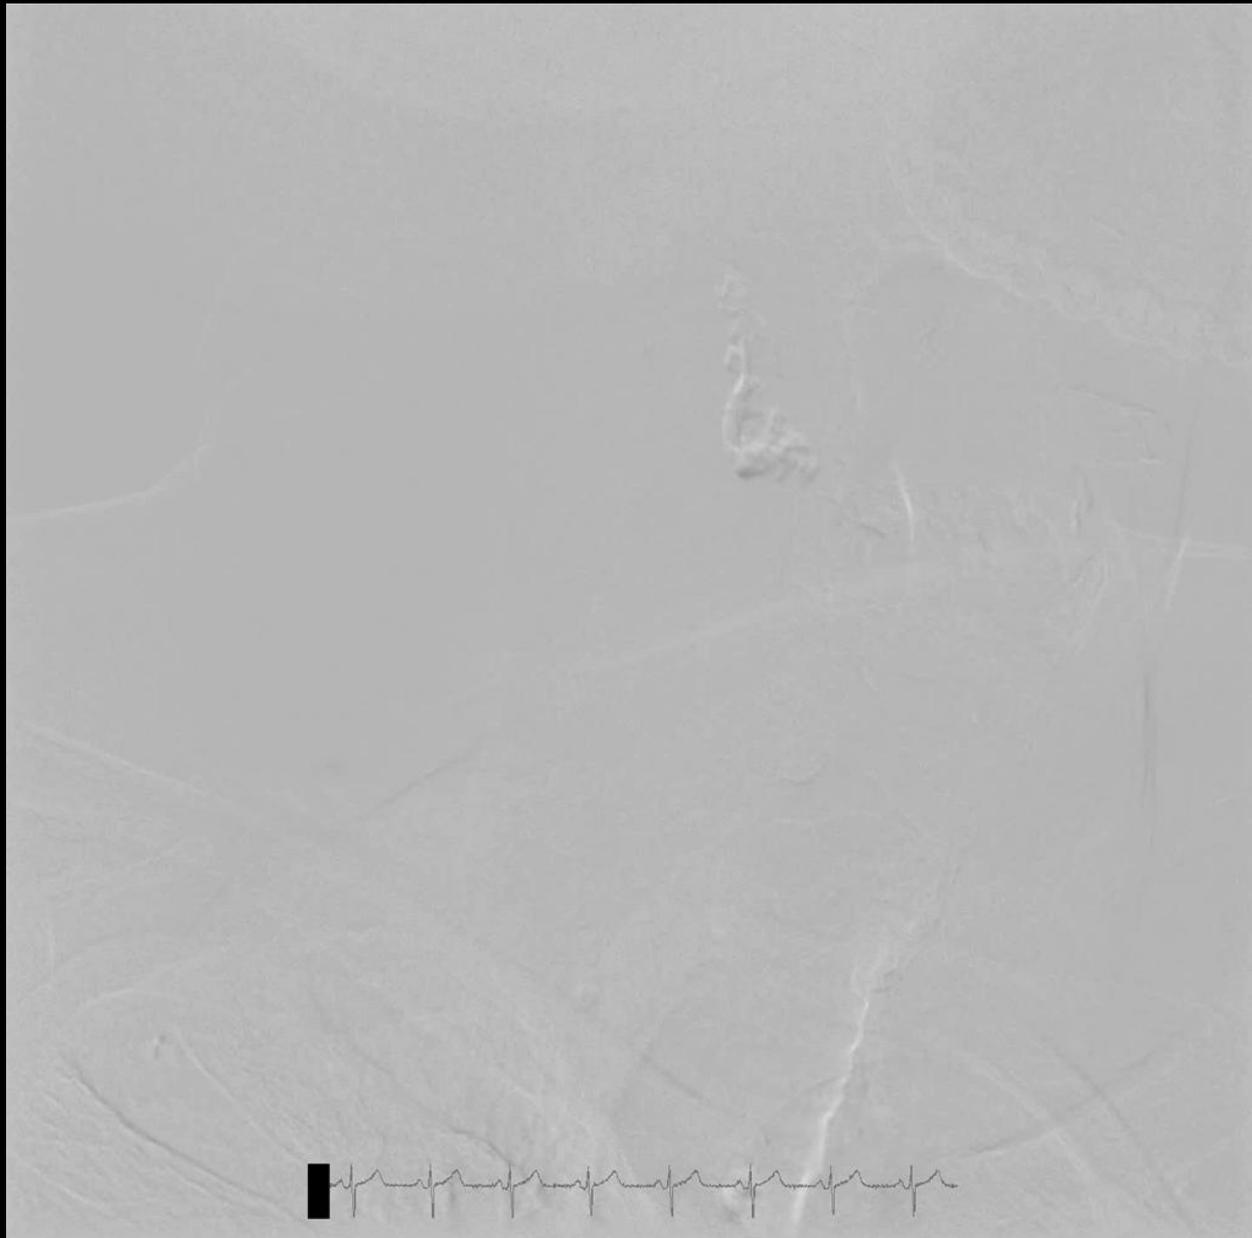

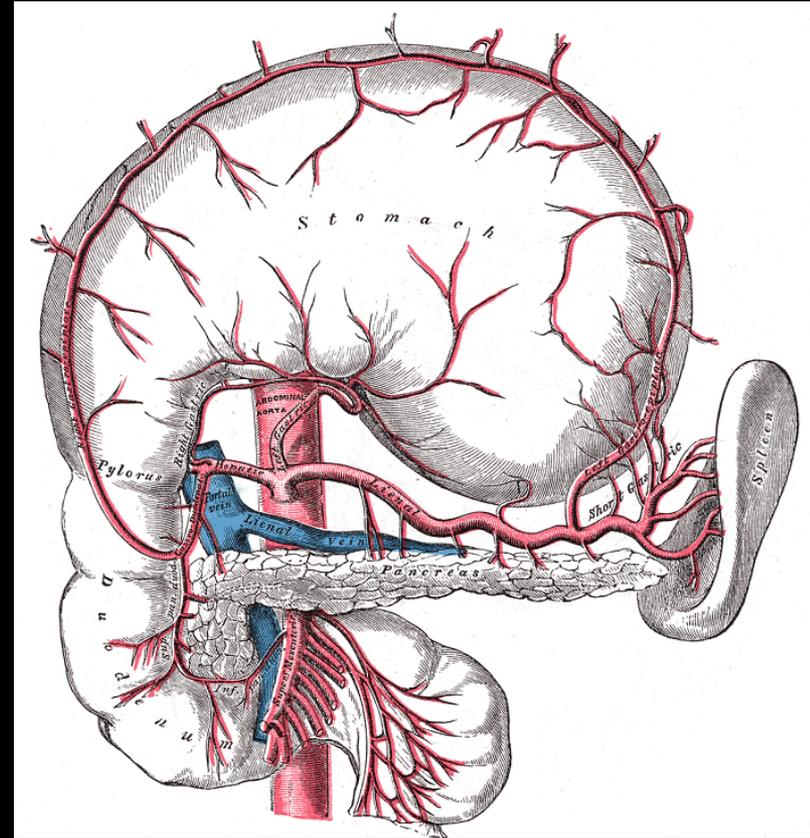

- Aortic arch
- Brachiocephalic a.
 - R common carotid a.
 - R subclavian a.
- L common carotid a.
- L subclavian a.
 - L vertebral a.

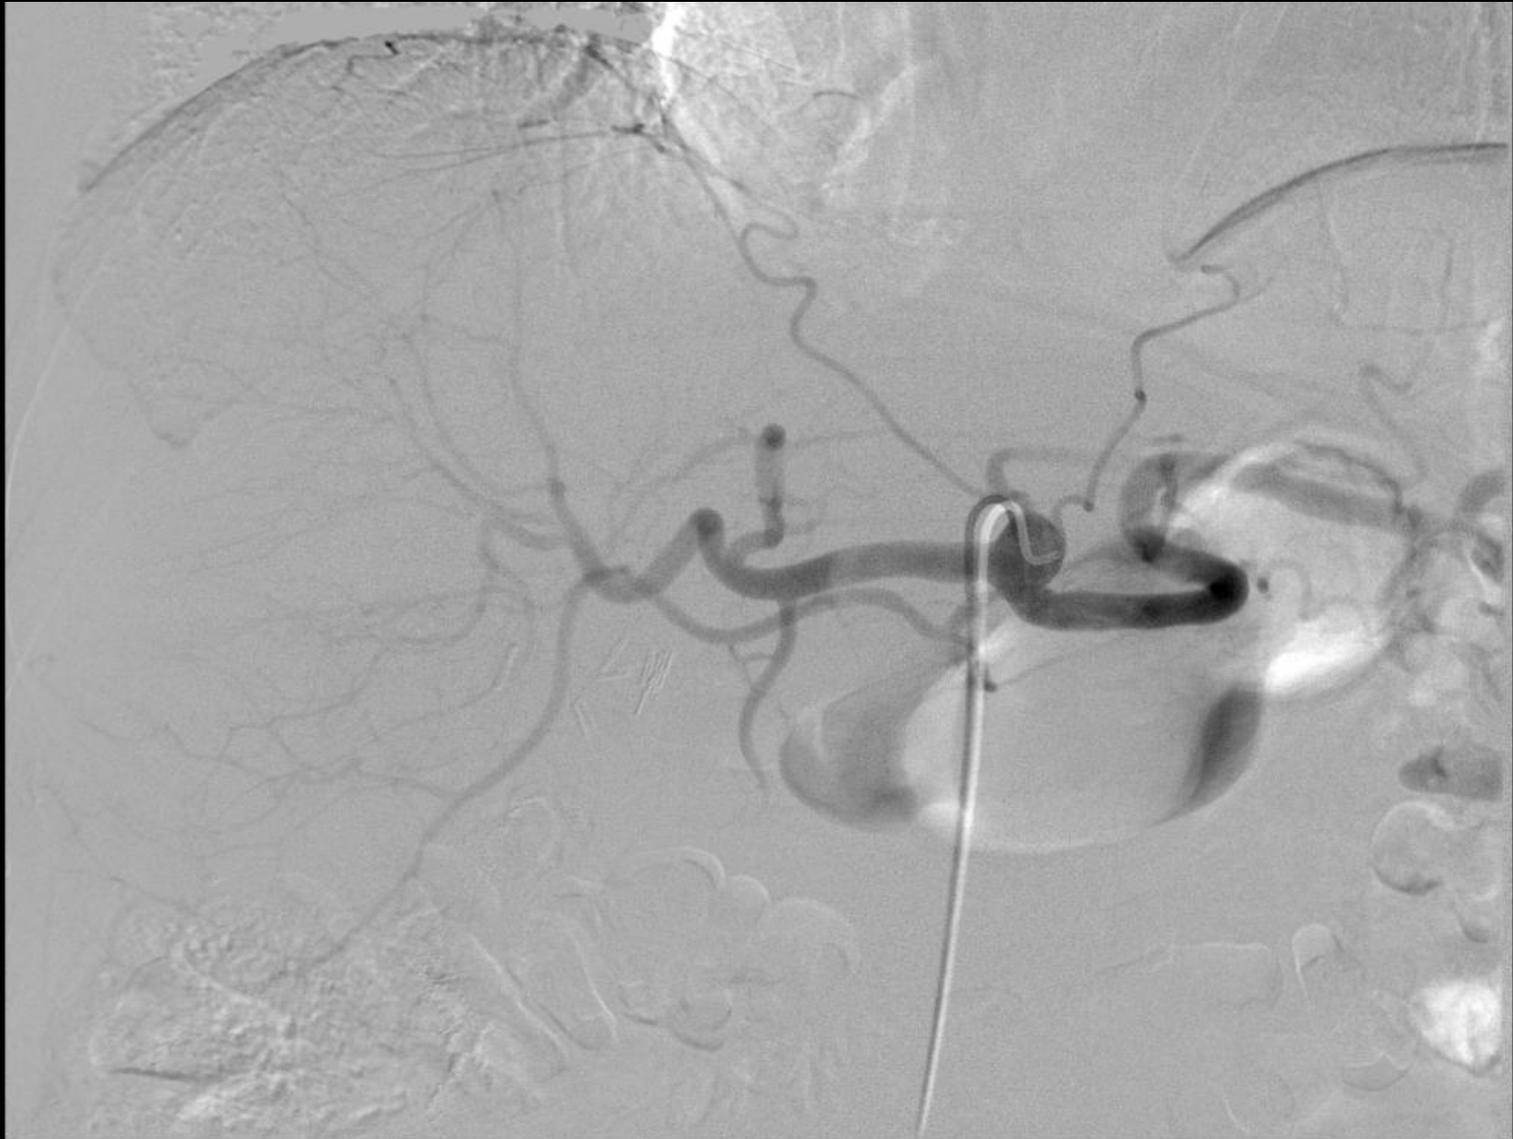

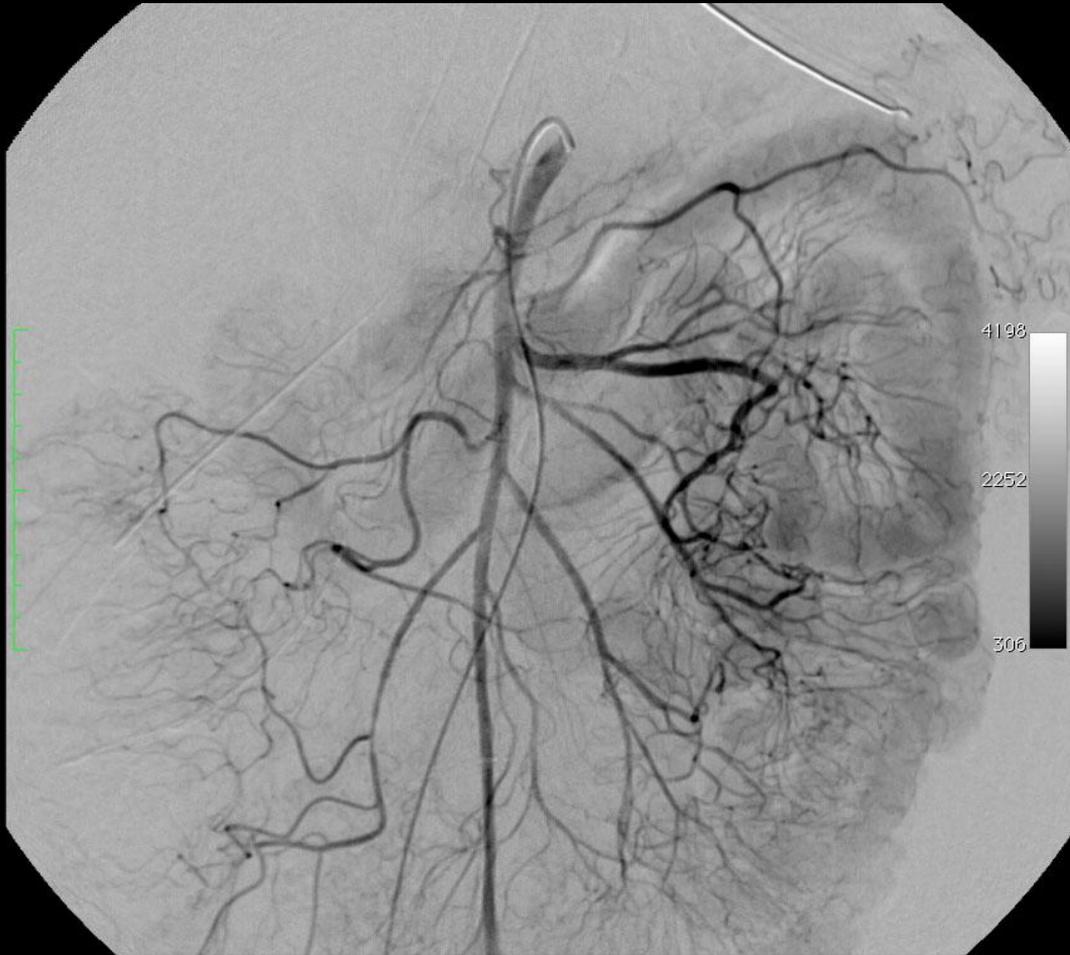

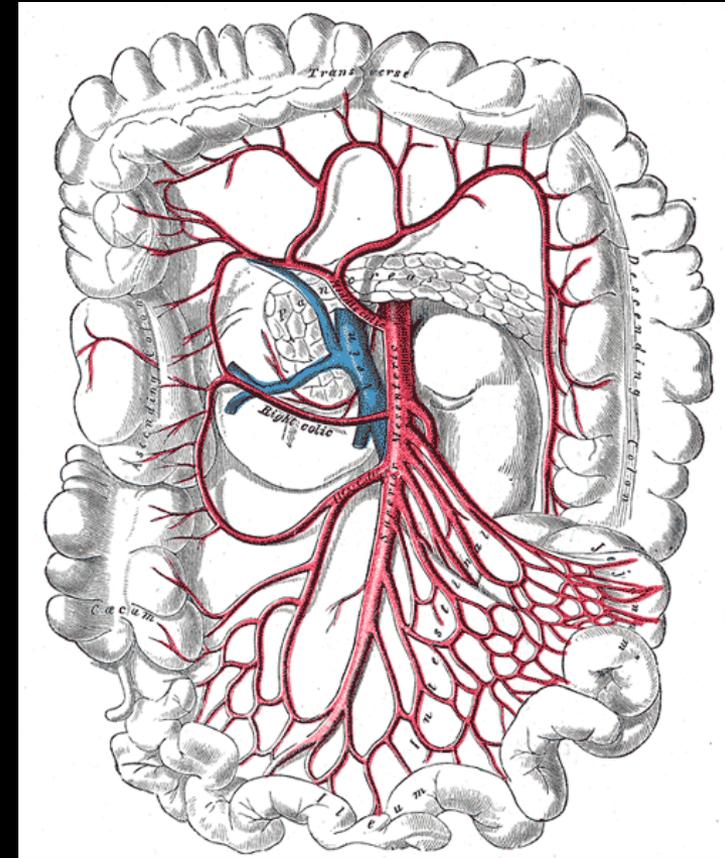

Gray's Anatomy

- Celiac a.
- L. gastric a.
- Common hepatic a.
- GDA
- Proper hepatic a.
- Splenic a.

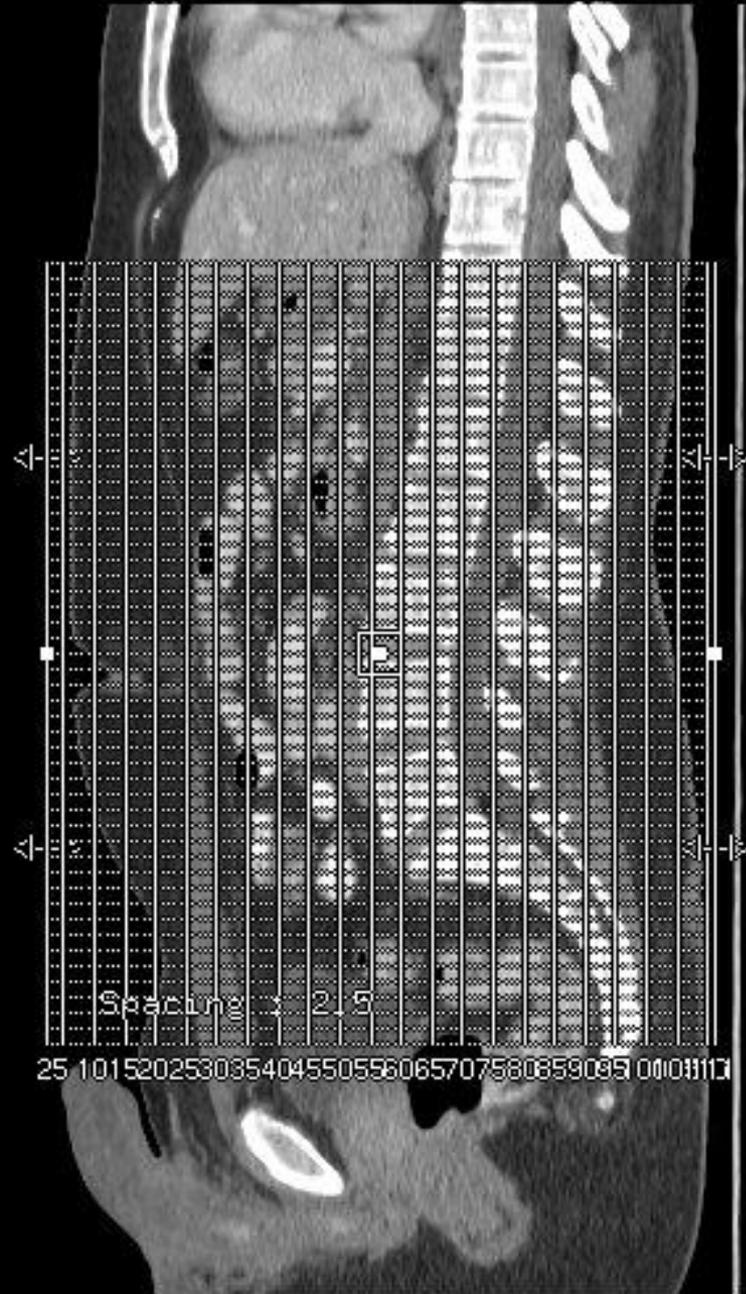

Stroeder J et al. Angiographic findings in non-occlusive mesenteric ischemia: an attempt of standardization. C-2114 ECR 2011

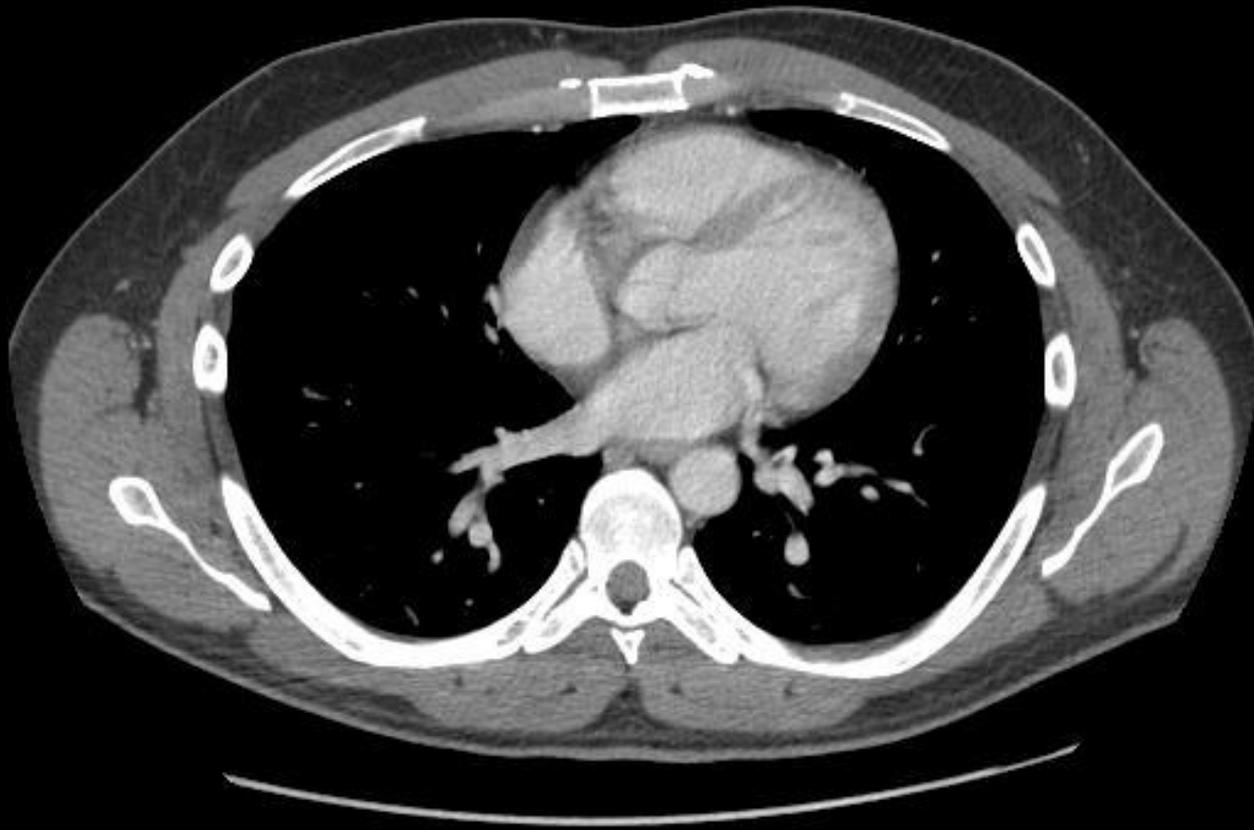

Gray's Anatomy

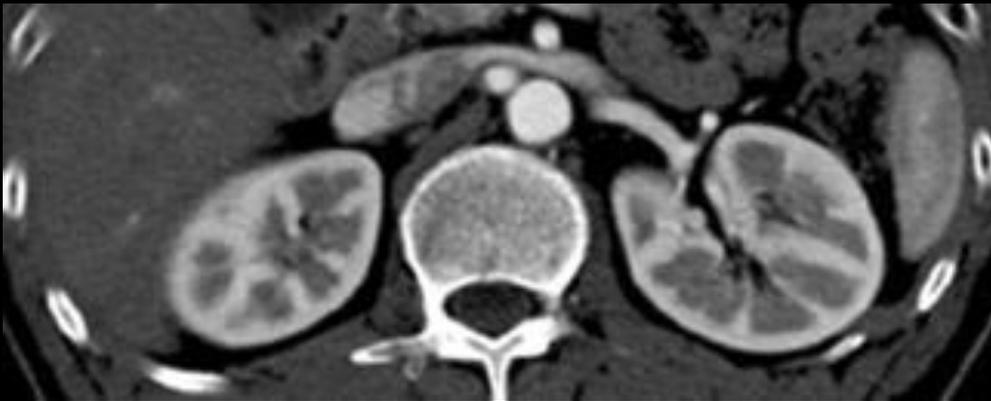

- Ileocolic a.
- Right colic a.
- Middle colic a.
- Intestinal a.
- Inferior pancreaticoduodenal a.

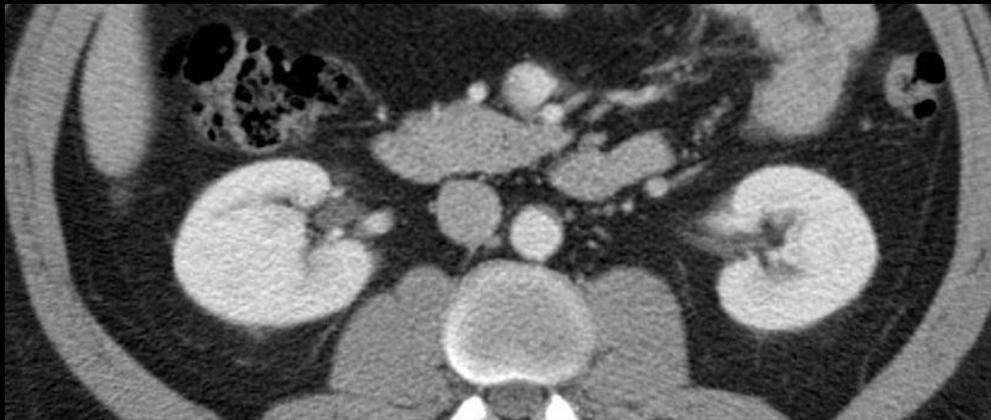

ABDOMINOPELVIC ANATOMY

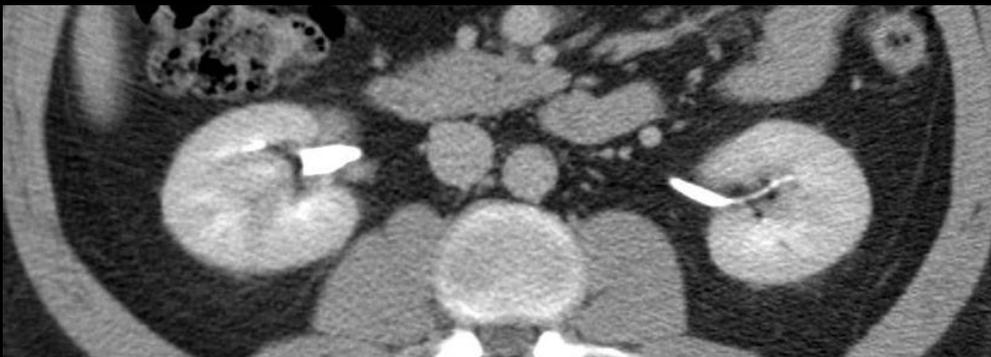

- Liver
- Spleen
- Stomach
- Pancreas
- Colon
- Small intestine
- Kidneys
- Portal vein
- IVC

Corticomedullary

Nephrographic

Excretory (delayed)

What radiographic projection is this?

45% 1. Left decubitus

21% 2. Right decubitus

34% 3. AP

4. PA

R

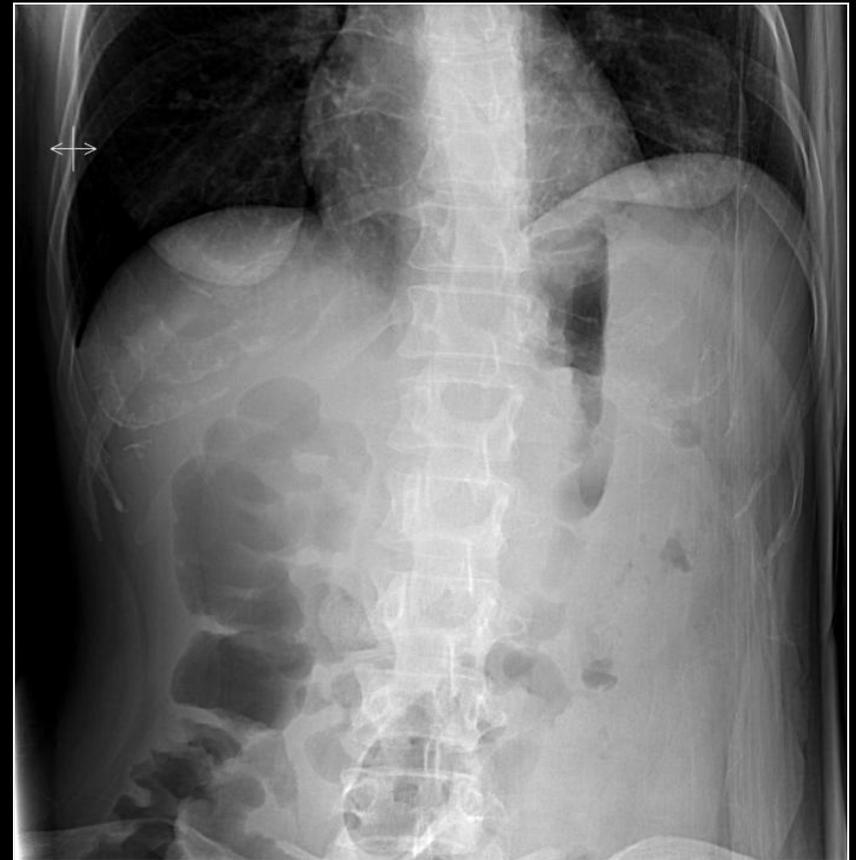

L

What radiographic projection is this?

1. Left decubitus
2. Right decubitus
3. AP
4. PA

R

L

What structure is identified?

7%

1. Olecranon

2. Greater tuberosity

18%

3. Greater trochanter

4%

4. Diaphysis

71%

5. Lesser trochanter

What structure is identified?

1. Olecranon
2. Greater tuberosity
3. Greater trochanter
4. Diaphysis
5. Lesser trochanter

What vessel is identified?

- 4% 1. Celiac a.
- 16% 2. Jugular v.
- 20% 3. Portal v.
- 8% 4. Brachiocephalic a.
- 52% 5. L common carotid a.

What vessel is identified?

1. Celiac a.
2. Jugular v.
3. Portal v.
4. Brachiocephalic a.
5. **L common carotid a.**

What region of the kidneys is enhanced in this image?

63% 1. Cortex

27% 2. Medulla

3% 3. Renal pelvis

7% 4. Capsule

5. Pole

What region of the kidneys is enhanced in this image?

1. Cortex
2. Medulla
3. Renal pelvis
4. Capsule
5. Pole

Bonus: What is depicted in this image?
